

## 'Porta' Portable Electric Tube Cleaners

### Features:

- Compact and portable for use in multiple locations
- Easy connect and disconnect of various shafts and cleaning tools
- Foot Switch enables operator to concentrate on cleaning operation
- Water moving through shaft flushes out deposits already dislodged by cleaning tools

The 'PORTA' is built for users to whom a small size and easy transportation mean that they can clean more tubes faster. It is used to clean 1/4" - 1" I.D. tubes in chillers, condensers, evaporators and heat exchangers. The flexible shaft rotates at 1760 rpm as water feeds through the nylon casing to the cleaning tool. As the tool removes the deposits, the water flow flushes them out. A solenoid valve ensures that water flows only when the machine is running. Water consumption can be regulated as needed.
